

Aarvi A Gaur

Digital experience designer

About me

My hobby is playing Chess. Chess is my favorite game. When I get some free time after my studies, I play chess with my friends. Chess is the game which requires Mental Fitness. So, after playing Chess when I study, I can better grab the concepts. I also become delighted by playing Chess because I don't waste my mind sitting in front of a computer or playing video games. Instead, I do some healthy activity. On every Sunday evening, I have two or three hours free. Mostly I play chess at that time. I also got another benefit

I have also made many inventions. I am also interested in Robotics, Coding, and etc....
